

| Au * | Sp * | Su * | Course# | Course Name | Course Description | Credits | Requisites | Exclusions |
|------|------|------|------------------------------------|---|---|---------|--|---|
| x | x | | 2020 (also @ Marion campus, Sp) | Introduction to Analog Systems and Circuits | Circuit theory and applications of passive components and Op amps. Introduction to analog systems using differential equations and Laplace transforms. | 3.0 | rereq: Engr 1182.01, 1182.02, 1182.03, 1282.01H, 1282.02H, 1282.03H, 1282.04H, or 1186, 1187 and 1188 concurrent; and Math 1152, 1161.01, 1161.02, 1172, or 1181H; and Physics 1250, or 1260; and CPHR 2.00 or above. | Not open to students with credit for 2100, 2100.02, 2100.06, 2100.07, 2100.08, 2105, 2106, 2110, 2127, 2137, or 2300. |
| - | - | | 2021 | Introduction to Analog Systems and Circuits for Transfer Students Lecture | Lecture-only component of ECE 2020, for transfer students. Circuit theory and applications of passive components and Op amps. Introduction to analog systems using differential equations and Laplace transforms. | 2.5 | Prereq: Math 1152 or 1161.01 or 1161.02 or 1172 or 1181H, and Physics 1250, 1250H or 1260, and CSE 1222 or 2221 or Engr 1281.01H or 1281.02H or 1222; and Engr 1182.01 or 1182.02 or 1182.03 or 1282.01H or 1282.02H or 1282.03H, or Engr 1186 and 1187 and concur: 1188 concurrent, or 1187 and 1188 and concur: 1186; and CPHR 2.00 or above. | Not open to students with credit for 2020, 2100, 2100.02, 2100.06, 2105, 2106, 2110, 2300, 205, 292, 294.03, or 301. |
| x | x | | 2027 | Introduction to Analog Systems and Circuits Lab for Transfer Students | Laboratory-only component of ECE 2020, for transfer students. Laboratory practice with circuit theory, analog systems, and applications of passive components and Op amps. | 0.5 | Prereq: 2021, and CPHR 2.00 or above. | Not open to students with credit for 2020, 2100, 2100.02, 2100.07, 2100.08, 2127, 2137, 209, 292, or 294.03. |
| x | x | | 2050 | Introduction to Discrete Time Signals and Systems | Introduction to sampled time signals and linear time invariant sampled time systems. | 3.0 | Prereq: 2000, or 2060, or 2061 and 2067. Prereq or concur: Math 2174 or 2568. | Not open to students with credit for 2100, 2100.01, 2100.04, 2104, or 2110. |
| | | | 2051 | Introduction to Discrete Time Signals & Systems Lecture | Introduction to sampled time signals and linear time invariant sampled time systems. Lecture only. | 2.5 | Prereq: 2000, or 2060, or 2061 and 2067. Prereq or concur: Math 2174 or 2568. | Not open to students with credit for 2100, 2100.01, 2100.04, 2104, 2110, or 2050. |
| | | | 2057 | Introduction to Discrete Time Signals & Systems Laboratory | Introduction to samples time signals and linear time invariant sampled time systems. Lab only. | 0.5 | Prereq or concur: 2051. | Not open to students with credit for 2100, 2100.01, 2100.04, 2110, or 2050. |
| x | x | | 2060 (also @ Marion campus, Sp) | Introduction to Digital Logic | Introduction to the theory and practice of combinational and clocked sequential networks. | 3.0 | Prereq: CSE 1222, 2221, Engr 1222, 1281.01H, or 1281.02H; and Math 1152, 1161.01, 1161.02, 1172, or 1181H; and Physics 1250, 1250H, or 1260; and Engr 1182.01, 1182.02, 1182.03, 1282.01H, 1282.02H, 1282.03H, 1282.04H, or 1186, 1187, and 1188 concurrent, or 1187, 1188, and 1186 concurrent, or major in CIS or CIS-PRE; and CPHR 2.00 or above. | Not open to students with credit for 2000, 2000.02, 2000.07, 2001, 2010, or 2017. |
| - | - | | 2061 | Introduction to Digital Logic for Transfer Students Lecture | Lecture-only component of ECE 2060, for transfer students. Introduction to the theory and practice of combinational and clocked sequential networks. | 2.5 | Prereq: Math 1152 or 1161.01 or 1161.02 or 1172 or 1181H, and Physics 1250, 1250H or 1260, and CSE 1222 or 2221 or Engr 1281.01H or 1281.02H or 1222; and Engr 1182.01 or 1182.02 or 1182.03 or 1282.01H or 1282.02H or 1282.03H, or Engr 1186 and 1187. and concur: 1188 concurrent, or 1187 and 1188 and concur: 1186, or major in CIS or CIS-PRE; and CPHR 2.00 or above. | Not open to students with credit for 2000, 2000.02, 2001, 2010, 2060, 261, 290, or 294.01. |

* These are the normal semesters of offering. While we try our best to offer courses on their regular schedule, please note that semesters of offering may change, particularly 5000-level and above.

| Au * | Sp * | Su * | Course# | Course Name | Course Description | Credits | Requisites | Exclusions |
|------|------|------|---------|---|--|----------|--|---|
| x | x | | 2067 | Introduction to Digital Logic Lab for Transfer Students | Laboratory-only component of ECE 2060 for transfer students. Laboratory practice with and application of the theory of combinational and clocked sequential networks. | 0.5 | Prereq: 2061, and CPHR 2.00 or above. | Not open to students with credit for 2000, 2000.02, 2000.07, 2017, 2060, 270, 290, or 294.01. |
| x | x | x | 2193 | Individual Studies in Electrical and Computer Engineering | Individual studies project. | 0.0-10.0 | Repeatable to a maximum of 12.0 cr hrs or 10 completions. This course is graded S/U. Permission of instructor required. | |
| x | x | | 2300 | Electrical Circuits and Electronic Devices | Introduction to circuit analysis; circuit analysis concepts and mechanical systems analogies; theory and applications of electronic devices; operational amplifiers; electrical instruments and measurements. | 3.0 | Prereq: Physics 1251 or 1261, and Math 1172 or 1544 or 2153 or 2162.01 or 2162.02 or 2182H or 4182H, and CPHR 2.0 or above, and enrollment in College of Engineering. | Not open to students majoring in ECE. |
| | | | 2301 | Electrical Circuits and Electronic Devices Lecture | Introduction to circuit analysis; circuit analysis concepts and mechanical systems analogies; theory and applications of electronic devices; operational amplifiers; electrical instruments and measurements. Lecture portion only. | 2.5 | Prereq: Physics 1251 or 1261, and Math 1172 or 1544 or 2153 or 2162.01 or 2162.02 or 2182H or 4182H, and CPHR 2.0 or above, and enrollment in College of Engineering. | Not open to students with credit for 2300, or students majoring in ECE. |
| | | | 2307 | Electrical Circuits and Electronic Devices Laboratory | Introduction to circuit analysis; circuit analysis concepts and mechanical systems analogies; applications of electronic devices; operational amplifiers; electrical instruments and measurements. Lab only. | 0.5 | Prereq or concur: 2301. | Not open to students with credit for 2300, or students majoring in ECE. |
| x | x | | 2560 | Introduction to Microcontroller-Based Systems | Hardware and software organization of a typical microcontroller; machine language programming, interfacing peripheral devices, and input-output programming; real-time computer applications. | 2.0 | Prereq: 2000, 2001, 2060, or 2061 and prereq or concur: 2000.07 or 2017; and CSE 1221, 1222, Engr 1281.01H, 1281.02H, or 1222, and enrollment in ECE, CSE, or EngPhysics major; or prereq or concur: 2010 or 2067, and permission of department. | Not open to students with credit for CSE 2421. |
| x | x | x | 2998.01 | Undergraduate Research | Supervised undergraduate research in various topics. | 0.5-3.0 | Prereq: Permission of instructor. Repeatable to a maximum of 6.0 cr hrs or 6 completions. | |
| x | x | x | 2998.02 | Undergraduate Research | Supervised undergraduate research in various topics. | 0.5-3.0 | Prereq: Permission of instructor. Repeatable to a maximum of 6.0 cr hrs or 6 completions. This course is graded S/U. | |
| x | x | | 3010 | Introduction to Radio Frequency and Optical Engineering | Waves and pulses on transmission lines; charges, fields, and potentials; inductance and capacitance; Faraday's law; Maxwell's Equations; plane wave propagation, polarization, reflection, and transmission. | 3.0 | Prereq: 2020, 2021, 2100, 2100.02, 2100.06, or 2105; and Physics 1251 or 1261, or both 1240 and 1241; and Math 2415 or 2174; and enrollment in ECE or EngPhysics major; or prereq or concur: 2010 or 2061, and permission of department. | Not open to students with credit for 3010.01, 3010.02. |
| x | x | | 3020 | Introduction to Electronics | Electronics: diode and transistor models for amplifiers, switches, and logic gates. Multiple transistor circuit analysis, op amps, and electronic systems. | 3.0 | Prereq: 2100 or 2020; or 2021 or 2106, and 2027 prereq or concur; and ECE or EngPhys major, or 2110 prereq or concur and permission of department. | |
| x | x | | 3027 | Electronics Laboratory | Electronic amplification, signal processing, timing, and power regulation circuits. Experiments with electronics evaluation modules and use of an analog system lab kit for electronics testing. | 1.0 | Prereq: 3020; and ECE or EngPhysics major. | |
| x | x | | 3030 | Semiconductor Electronic Devices | Semiconductor materials and devices. Crystals; bandstructure; charge carrier statistics; excess carriers, transport; PN junction; Schottky barrier; bipolar and field-effect transistors; optoelectronic devices; nanoscale devices. | 3.0 | Prereq: 2020, 2021 or 2100; and Physics 1251, 1261, or both 1240 and 1241; and Chem 1210, 1220 or 1250; and enrollment in ECE, MSE, or EngPhysics major. Prereq or concur: Math 2415 or 2174. | |

* These are the normal semesters of offering. While we try our best to offer courses on their regular schedule, please note that semesters of offering may change, particularly 5000-level and above.

| Au* | Sp* | Su* | Course# | Course Name | Course Description | Credits | Requisites | Exclusions |
|-----|-----|-----|---------|--|--|---------|--|---|
| x | x | | 3040 | Sustainable Energy and Power Systems I | Introduction to electrical energy systems; history, current trends, renewable and non-renewable sources, rotating machines and their operation, and smart grid initiatives. | 3.0 | Prereq: 2100, 2100.02, 2105, 2020, 2021, 205, 292 or 294 (Spring 2011), and enrollment in ECE or EngPhysics major. | Not open to students with credit for 341. |
| x | x | | 3047 | Electrical Energy Conversion Laboratory | Laboratory introducing basics of energy conversion processes for electrical energy supply systems utilizing conventional rotating machines and hardware-in-the-loop simulation system for sustainable energy systems. | 1.0 | Prerequisites: ECE 3040 or 341, and acceptance in ECE or Eng Physics majors. | Not open to students with credit for ECE 447 |
| x | x | | 3050 | Signals and Systems | Linear systems and models in continuous and discrete time; convolution; Fourier series and transform; frequency response; Laplace transform; z-transform; applications. | 3.0 | Prereq: 2020, 2050, and 2060; or 2100; and Math 2568 (568) or 571; and prereq or concur Math 2415; and enrollment in ECE or EngPhysics major. | Not open to students with credit for 352. |
| - | - | | 3080 | Ethics and Professional Practice | Professional responsibilities; IEEE code of ethics; engineering as social experimentation; safety and risk; professional issues in organizations; case studies; global awareness. | 1.0 | Prerequisite: Jr or Sr standing, and enrollment in ECE major. | Not open to students with credit for ECE 481. |
| x | x | | 3090 | Technical Writing and Presentations | Technical writing and communications skills. | 1.0 | Prereq: Credit for a second writing course, and enrollment in ECE major. | |
| x | x | | 3551 | Introduction to Feedback Control Systems | The course provides fundamental concepts in feedback control systems design and analysis. | 3.0 | Prerequisite: ECE 3050 or 352 . | Not open to students with credit for ECE 551 |
| x | x | | 3557 | Control Systems Laboratory | Utilization of real-world plants for computer control; use of a commercially available software package (Matlab) for computer-aided analysis and design | 1.0 | Prerequisites: ECE 551, or prerequisite or concurrent ECE 3551; and acceptance in ECE or Eng Physics majors. | Not open to students with credit for ECE 557. |
| x | x | | 3561 | Advanced Digital Design | Design and analysis of sequential circuits; digital circuit design using building blocks, programmable logic devices; design of basic computer components such as arithmetic logic units. | 3.0 | Prereq: 2000, 2060, 2061, 2010, 2000.02, 290, 294 (Au10) or 206 and 261. Prereq or concur: 3020 (323), and enrollment in ECE, EngPhys, or CSE majors; or prereq or concur: 2010, and permission of department. | Not open to students with credit for 561. |
| x | x | | 3567 | Microcontroller Lab | Laboratory in which a microcontroller is used to interface real-world hardware to make a functioning system. | 1.0 | Prereq: 2560 or CSE 2421, and enrollment in ECE, CSE, or EngPhysics major. | Not open to students with credit for 3567.01 . |
| x | x | | 3900 | Capstone Design I | Fundamentals of the engineering design process. Design principles and methodology. Project management during design. | 1.0 | Prereq: Sr standing and enrollment in the ECE major. Prereq or concur: 3090. | Not open to students with credit for 4900, 4900H, 4901, Engr 4901, 4903, 5901.01, or 5901.02H. |
| x | x | | 3905 | Capstone Design I | Fundamentals of the engineering design process. Application of design principles and methodology to conceptual and detailed technical design. Project management during design. | 3.0 | Option 1: Prereq or concur: 3080 or Philos 1332, and ECE 2560, 3010, 3020, 3027, 3030, 3040, 3050, and 3090, and Sr standing, and enrollment in Electrical Engineering Program of Study (EES subplan) of the ECE major. Option 2: Prereq or concur: ECE 2050 or 2100, and 3080 or Philos 1332, and ECE 3020, 3027, 3090, 3561, 3567, CSE 2231, and 2451, and Sr standing, and enrollment in Computer Engineering Program of Study (CES subplan). This course is progress graded. | Not open to students with credit for 3900, 4900, 4900H, 4901, Engr 5901.01, 5901.02H, 5902.01, or 5902.02H. |
| x | | | 4021 | Analog Integrated Circuits I | Fundamentals of analog integrated circuits. CMOS transistors and diodes large-signal and small-signal operation and modeling. On-chip passive components operation and modeling. Simple and advanced current mirrors, single-ended and differential CMOS amplifiers, CMOS OTAs and Op-Amps. Integrated Circuits Fabrication, Packaging, and Testing. | 3.0 | Prereq: 3020 | Not open to students with credit for 5021. |

* These are the normal semesters of offering. While we try our best to offer courses on their regular schedule, please note that semesters of offering may change, particularly 5000-level and above.

| Au* | Sp* | Su* | Course# | Course Name | Course Description | Credits | Requisites | Exclusions |
|-----|-----|-----|----------|---|---|----------|--|--|
| x | x | x | 4193 | Individual Studies in Electrical and Computer Engineering | Individual studies project. | 0.0-12.0 | Repeatable to a maximum of 12.0 cr hrs or 12 completions. This course is graded S/U. | |
| x | | | 4567 | Design of Mobile Internet-of-Things | This course focuses on theoretical and practical insights into design of Internet of Things architectures and mobile platforms. Concepts covered in this course include general IoT architectures, sensor, processing, and communication resources, device and cloud connectivity, mobility support. Practical aspects will be studied with lab assignments and the semester-long group projects. | 4.0 | Prereq: 2560, 3020, and 3027 | |
| x | x | | 4900 | Capstone Design II | Application of design principles and methodology to conceptual and detailed technical design, implementation, and testing of a capstone project. | 3.0 | Prereq: Option 1: 2560, 3010, 3020, 3027, 3030, 3040, 3050, 3090, and 3900, and Sr standing, and enrollment in Electrical Engineering Program of Study (EES subplan) of the ECE major. Prereq or concur: 3080 or PHILOS 1332. Option 2: 2050 or 2100; 3020, 3027, 3090, 3561, 3567, 3900, CSE 2231, and 2451, and Sr standing, and enrollment in Computer Engineering Program of Study (CES subplan). Prereq or concur: 3080 or PHILOS 1332, and 5362. | Not open to students with credit for 4900H, 4901, or Engr 4903 or 5902.01. |
| x | x | x | 4901 | Capstone Design II Special | Application of design principles and methodology to conceptual and detailed technical design, implementation, and testing of a capstone design project. Teams of at least three arrange special projects with a faculty member. | 3.0 | Prereq: Option 1: 2560, 3010, 3020, 3027, 3030, 3040, 3050, 3090, 3900 and Sr standing, and enrollment in Electrical Engineering Program of Study (EES subplan) of the ECE major. Prereq or concur: 3080 or PHILOS 1332. Option 2: 2050 or 2100; 3020, 3027, 3090, 3561, 3567, 3900, CSE 2231, CSE 2451, and Sr standing, and enrollment in Computer Engineering Program of Study (CES subplan). Prereq or concur: 3080 or PHILOS 1332, and 5362. | Not open to students with credit for 4900, 4900H, or Engr 4903 or 5902.01. |
| x | x | | 4905 | Capstone Design II | Application of project management, design principles and methodology to conceptual and detailed technical design, implementation, and testing of a capstone project. | 3.0 | Prereq: 3905. | Not open to students with credit for 4900, 4900H, 4901, Engr 5901.01, 5901.02H, 5902.01, or 5902.02H |
| x | x | | 4905H | Design II with Honors Thesis Project | Application of design principles and methodology to conceptual and detailed technical design, implementation and testing, culminating in a capstone design project. | 3.0 | Prereq: Prereq: 3905, Honors standing, and permission of department | Not open to students with credit for 4900, 4900H, 4901, or 682, or ENGR 5902.01., 590.01H, 5902.01, or 5902.01H. |
| x | x | x | 4998.01 | Undergraduate Research | Supervised undergraduate research in various topics. | 0.5-3.0 | Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs or 6 completions.- | |
| x | x | x | 4998.01H | Undergraduate Honors Research | Supervised research in various topics for undergraduate honors students. | 0.5-3.0 | Prereq: Honors standing; or GPA 3.4 or above, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 6 completions. | |
| x | x | x | 4998.02 | Undergraduate Research | Supervised undergraduate research in various topics. | 0.5-3.0 | Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U. | |
| x | x | x | 4999.01 | Undergraduate Thesis Research | Undergraduate Thesis (Distinction) research on topics in Electrical & Computer Engineering. | 0.5-3.0 | Prereq: GPA 3.0 or above, and enrollment in ECE major, and approved Thesis (Distinction) project. Repeatable to a maximum of 6 cr hrs or 6 completions. | |

* These are the normal semesters of offering. While we try our best to offer courses on their regular schedule, please note that semesters of offering may change, particularly 5000-level and above.

| Au* | Sp* | Su* | Course# | Course Name | Course Description | Credits | Requisites | Exclusions |
|-----|-----|-----|----------|---|---|---------|---|--|
| x | x | x | 4999.01H | Undergraduate Honors Thesis Research | Undergraduate Honors Thesis (Distinction) research on topics in electrical & computer engineering. | 0.5-3.0 | Prereq: Honors Status or minimum GPA of 3.4 and approved Honors Thesis (Distinction) Project. Repeatable to a maximum of 6 cr hrs or 6 completions. | Open only to Electrical and Computer Engineering majors. |
| x | x | | 5000 | Introduction to Analog and Digital Communications | Communications channel modeling, analog communication schemes, digital communication schemes, error rate analysis, and error control coding. | 3.0 | Prereq: 3050, and Stat 3470 or Physics 3700; or Grad standing. | |
| | x | | 5007 | Communications Laboratory | A laboratory in analog and digital data communications using a software-defined radio platform; amplitude modulation, frequency modulation, timing recovery, pulse shaping, phase shift keyed modulation. | 0.5 | Prereq or concur: 5000 (501), and enrollment in ECE or EngPhysics major; or Grad standing in ECE. | Not open to students with credit for 4007 or 508. |
| x | | | 5010 | Wireless Propagation and Remote Sensing | Practical methods for predicting tropospheric, groundwave, and ionospheric propagation, including refraction, reflection, and extinction effects. Study of remote sensing systems and their applications. | 3.0 | Prereq: 3010, or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. | |
| | x | | 5011 | Antennas | Electromagnetic radiation; fundamental antenna parameters; dipole, loops, patches, broadband and other antennas; array theory; ground plane effects; horn and reflector antennas; pattern synthesis; antenna measurements. | 3.0 | Prerequisites: ECE 3010 or 312 or or graduate standing in engineering or biological sciences or math & physical sciences. | Not open to students with credit for ECE 711. |
| | x | | 5012 | Integrated Optics | Fundamentals of planar lightwave circuits and guided wave devices; laser light in anisotropic media; electrooptic and nonlinear optical effects; concepts in telecommunications, RF photonics, nanobiotechnology. | 3.0 | Prerequisites: ECE 3010, or grad standing in engineering or biological sciences or math & physical sciences. | |
| | x | | 5013 | Introduction to Radar Systems | Introduces the fundamentals of radar such as the main concepts and techniques used in modern radar systems. The class is a survey course exposing students to a wide range of radar applications and design issues. | 3.0 | Prereq: 3050, and 3010 or 3010.01, and Stat 3470; or Grad standing in Engr. | Not open to students with credit for 5194.01. |
| x | | | 5017 | Microwave Engineering | Transmission line theory; multiconductor; S-parameters; transformers, couplers, filters, resonators, circulators; electromagnetic interference and compatibility; computer-aided design; microstrip realization and testing with a network analyzer. | 4.0 | Prereq: 3010, and enrollment in ECE major; or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. | |
| x | | | 5020 | Mixed Signal VLSI | Design and circuit analysis of basic VLSI structures such as registers, cell libraries, digital and analog I/O. Physical layout, timing analysis, PLLs, design tools. | 3.0 | Prerequisites: 3020, or graduate standing in engineering or biological sciences or math & physical sciences. | |
| x | | | 5021 | Analog Integrated Circuits II | Advanced analog integrated circuits. Linear feedback networks design and stability analysis, multi-stage CMOS op-amp design and compensation, fully-differential op-amps and common-mode feedback networks, comparators, transconductors, bandgaps, sample and hold circuits, switched-capacitor circuits, noise analysis of CMOS circuits. | 3.0 | Prereq: 4021, or Grad standing in Engineering and permission of instructor. | |
| x | | | 5022 | Radio Frequency Integrated Circuits | Modulation, wireless standards, transceiver architecture, transistor models, passive component models, LNA, VCO, PLL, Mixers, integrated PA, RFIC layout | 3.0 | Prereq or concur: 4021 or 5021, or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. | Not open to students with credit for ECE620. |

* These are the normal semesters of offering. While we try our best to offer courses on their regular schedule, please note that semesters of offering may change, particularly 5000-level and above.

| Au * | Sp * | Su * | Course# | Course Name | Course Description | Credits | Requisites | Exclusions |
|------|------|------|---------|--|--|---------|---|--|
| | x | | 5023 | Introduction to Data Converters and Phase-Locked Loops | This course focuses on fundamentals of data converters and timing circuits, including discrete-time analog/mixed signal analysis and signal conditioning for asynchronous and synchronous computing. The topics include analog switches, sampling circuits, switched-capacitor amplifiers and filters, ADCs, DACs, PLLs, DLLs and discrete-time neural networks. | 3.0 | Prereq: 4021, or Grad standing in Engr or Physics. | |
| x | | | 5025 | Power Electronics Devices, Circuits, and Applications | The course will provide an introduction to power electronic conversion principles. Analytical techniques will be developed through the study of widely used converter circuits. | 3.0 | Prerequisite: ECE3020 or ECE 323 or graduate standing in engineering or biological sciences or math & physical sciences. | Not open to students with credit for ECE 624, 724 or 844. |
| | x | | 5027 | Microwave Active Circuits | Design principles of microwave transistor amplifiers and oscillators; low-noise, power and broadband amplifiers; linearization; computer-aided design; microstrip realizations and testing in the laboratory. | 4.0 | Prerequisites: Acceptance in ECE major and ECE 3020 or 323; or graduate standing in engineering or biological sciences or math & physical sciences. | Not open to students with credits for ECE723 |
| | x | | 5031 | Semiconductor Process Technology | Discrete and integrated circuit device design, silicon VLSI processing technologies, III-V compound semiconductor device fabrication technologies; epitaxy, doping, bandgap engineering; and device measurements and failure mechanisms. | 3.0 | Prerequisite: ECE 3030, or graduate standing in engineering, biological sciences, or math & physical sciences. | |
| | xo | | 5033 | Surfaces and Interfaces of Electronic Materials | Provides the fundamental and practical basis for designing, processing, and characterizing the interfaces controlling the next generations of microelectronic and optoelectronic device structures. | 3.0 | Prereq: 3030, and Physics 1250 or 1250H; or Grad standing in Engineering, Biological Science, or Math and Physical Sciences. | |
| x | | | 5037 | Solid State Electronics and Photonics Laboratory | Introduction to laboratory techniques for semiconductor device fabrication including photolithography, oxidation, diffusion, chemical processes, reactive ion etching, and metallization; fabrication and measurements of visible light emitting diodes (LED) and GaN High Electron Mobility Transistor (HEMT). | 4.0 | Prerequisite or concur: 3030, and acceptance in ECE, MSE or EngPhysics major; or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. | |
| | x | | 5041 | Electric Machines | Principles of electromechanical energy conversion; basic structures of electric machines; steady state models and performance analysis; Advanced topics on AC machine control. | 3.0 | Prerequisites: ECE 3040 or 341, and ECE 3020 or 323; or graduate standing in engineering or biological sciences or math & physical sciences. | Not open to students with credit for ECE 643 or ECE 743. |
| x | | | 5042 | Power Systems | A power system analysis course presenting power systems loads, modeling of transformers and power system model for voltage calculation and faults. | 3.0 | Prerequisite: 3040, or graduate standing in Engineering, Biological Sciences, or Math and Physical Sciences. | Not open to students with credit for ECE 640, 740, or 741. |
| | x | | 5043 | Power Systems - Analysis and Operation | Power systems analysis and operations, including steady-state analysis, state estimation, and economic operation. | 3.0 | Prereq: 3040, Sr. standing, and ECE major; or Sr standing and ISE major; and Math 2568; or Grad standing in engineering or biological sciences or math and physical sciences. | Cross-listed with ISE 5043. |
| | x | | 5047 | High Voltage Engineering and Laboratory | Dielectric strength and breakdown of gases, liquids, and solids, electric field design problems in power system equipment; laboratory study of high voltage insulation. | 3.0 | Prerequisite: Acceptance in ECE major, and ECE 3040 or ECE 341; or graduate standing in engineering or biological sciences or math & physical sciences. | Not open to students with credit for ECE 747. |
| | x | | 5050 | Humanitarian Engineering | Poverty and underdevelopment. Goal of social justice. Development strategies. Engineering for the poor, weak, and developing communities. Humanitarianism in the university and engineering enterprise. | 3.0 | ENGR 1182 or 1282H, or grad standing, or permission of instructor. | Not open to students with credit for ENGR 5050. |

* These are the normal semesters of offering. While we try our best to offer courses on their regular schedule, please note that semesters of offering may change, particularly 5000-level and above.

| Au * | Sp * | Su * | Course# | Course Name | Course Description | Credits | Requisites | Exclusions |
|------|------|------|---------|---|--|---------|--|--|
| xe | | | 5070 | Neuroengineering and Neuroprosthetics | An overview of the broad field of Neuroengineering for graduate and senior undergraduate students with engineering or neuroscience backgrounds. Focusing on neural interfaces and prostheses, this course covers from basic neurophysiology and computational neuronal models to advanced neural interfaces and prostheses currently being actively developed in the field. | 3.0 | Prereq: 3050 or BiomedE 3703 or Neurosc 3010, or Grad standing in Engineering or Neurosc. | Not open to students with credit for 5194.03 or Neurosc 5070. Cross-listed in Neurosc. |
| | x | | 5078 | Empowering the Entrepreneurial Electrical and Computer Engineer | This course will teach entrepreneurial minded engineers the process of value creation from their ECE relevant technology or inventions. Topics covered will include self-assessment as an entrepreneur and innovator, analysis and validation of new venture opportunities, intellectual property creation and assessment new venture planning and project management, leadership and team building. | 3.0 | Prereq: 3010, 3020, 3030, 3040, or 3050; or grad standing in Engineering | Not open to students with credit for 5194.13. |
| | x | | 5101 | Introduction to Wireless Networking | Fundamental concepts in cellular design, Wireless-LANs, MANETs, and sensor networks will be explored. Specific topics will include propagation, fading, cellular-design, power-management, routing, scheduling, and control. | 3.0 | Prereq or concur: 3561 (561) or CSE 3461 (677), or Grad standing in Engineering or Math and Physical Sciences. | Not open to students with credit for CSE 5463. Cross-listed in CSE 5463. |
| | xo | | 5120 | Introduction to Integrated Circuits Test and Measurement | Parametric testing techniques for analog, digital, mixed and RF ICs, DSP-based testing; noise effects on accuracy; Design-for-Test and Built-in-Self Tests. | 3.0 | Prereq: 3020, or 323 and 351, or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. | Not open to students with credit for 625, 694 (Sp09), or 694.04. |
| x | | | 5127 | Power Electronics Lab | Laboratory introducing basic circuits of power electronics, and simulation and control hardware and software for various power and energy applications. | 1.0 | Prereq: ECE 3040 (341) and enrollment in ECE major, or Grad standing in Engineering. | Not open to students with credit for 628 or 647. |
| | xe | | 5131 | Lasers | Atomic interaction with radiation, cavities with gain, Gaussian beams, light-emitting diodes, semiconductor lasers. | 3.0 | Prereq: 3010 and 3030, or graduate standing in engineering or biological sciences or math & physical sciences. | Not open to student with credit for ECE 732. |
| xe | | | 5132 | Photonics | Fiber optics, optical systems and devices, optical detection, photonic band gaps, holography, and optical data storage. | 3.0 | Prereq: 3010, 3010.01, or 3010.02, and 3030 or 3030.01; or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. | Not open to students with credit for 5132.01. |
| | | | 5194.09 | Optoelectronic Devices and Light Emitting Diodes | In this course, we will study the optical transitions and absorptions in semiconductors. We will discuss the optical processes in semiconductor bulk as well as low dimensional structures such as quantum well, quantum wire and quantum dot. The fundamentals, technologies and applications of light emitting diodes will be introduced. We will learn the current state-of-the-art of these devices. | 3.0 | Prereq: 3030 and 3010. | |
| | | | 5194.11 | Robust Control with Applications to Time Delay Systems | Review of time and frequency domain analysis and design of feedback systems. Internal stability, asymptotic tracking, performance. Robust stability and robust performance. strong Stabilization. Parametrization of stabilizing controllers. Delay margin. Model matching. Introduction to H-infinity control. | 3.0 | Prereq: 3551 or AERO 3521 or MAE 3360 or grad standing. | |
| | | | 5194.14 | Semiconductor Material and Device Characterization | This course will mainly cover several characterization techniques based on optical, electrical and chemical/physical methods that are used for semiconductor materials and devices. It will be discussed how material and device parameters, such as resistivity, carrier and doping density, contact resistance, mobility, series resistance, and carrier lifetime are measured using these methods. | 3.0 | Prereq: 3030; or Grad standing in Engineering, Biological Science, or Math and Physical Sciences. | |

* These are the normal semesters of offering. While we try our best to offer courses on their regular schedule, please note that semesters of offering may change, particularly 5000-level and above.

| Au * | Sp * | Su * | Course# | Course Name | Course Description | Credits | Requisites | Exclusions |
|------|------|------|---------|---|---|---------|--|---|
| x | x | | 5200 | Introduction to Digital Signal Processing | Sampling and reconstruction; discrete-time rate conversion; processing of discrete-time signals; design of discrete-time filters, selected topics in adaptive and/or multidimensional signal processing. | 3.0 | Prereq: 3050, and Stat 3470 or Math 4530, or Grad standing. | |
| | x | | 5206 | Medical Imaging and Processing | Introduction to medical imaging techniques (CT, MRI, PET, ultrasound), including data collection, image reconstruction, physics of tissue interactions, and digital processing of medical images. | 3.0 | Prerequisite: ECE 352 or ECE 3050, Co- or prerequisite: ECE 582 or ECE 3090; or graduate standing in ECE, Biomedical Engineering or Biophysics | Not open to students with credit for ECE 706 |
| | x | | 5207 | Real-Time Digital Signal Processing Laboratory | Real-time signal processing of acoustic signals and video images; finite impulse response filters; adaptive filtering; array processing; fast Fourier transform. | 0.5 | Prereq or concur: 5200, and enrollment in ECE major or Grad standing in ECE. | Not open to students with credit for 4207 or 609. |
| | x | | 5227 | Fundamentals of Power Management Integrated Circuits for VLSI Systems | Theory, design and applications of integrated power management integrated circuits in VLSI systems. This includes: system and circuit architectures, performance metrics, practical implementations, design considerations in VLSI systems in advanced CMOS processes, and design techniques for integrated power regulators and battery chargers. Background in basic analog design is strongly recommended. | 4.0 | Prereq: 4021, or Grad standing in Engineering or Physics. | |
| | x | | 5237 | Photovoltaics Laboratory | Introduction to laboratory techniques for processing and fabrication of inorganic and organic solar cells, and photovoltaic testing and measurement techniques to characterize solar cells. | 4.0 | Prereq: 3030 or MatScEn 3271, and enrollment in ECE or MatScEn major; or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. Cross-listed in MatScEn. | |
| | x | | 5244 | Si and Wide Band Gap Power Devices | Basic design and operation of Si and Wide Band Gap (WBG: SiC, GaN and ultra wide band gap semiconductors) power devices and the applications of commercial devices in power electronics applications. Trade-offs between various devices. Static and dynamic operation. Comparison of Si and SiC devices and design differences. | 3.0 | Prereq: 3030, or grad standing in engineering or physics. | Not open to students with credit for 5194.07 or 5234. |
| | x | | 5300 | Introduction to Machine Learning for ECE | Coverage includes linear regression, linear classification, model and feature selection, neural networks, clustering, and principle components analysis. Python will be used for implementation examples. | 3.0 | Prereq: CSE 1222 or ENGR 1281.xx; and Math 2568 and Stat 3470, and enrollment in ECE major or Grad standing. | Not open to students with credit for ECE 4194.02 (Sp19, Machine Learning), 4300, or MechEng 5194 (Au19, Applied ML for MAF) |
| x | x | | 5362 | Computer Architecture and Design | Design of general purpose digital computers including arithmetic and control units, input/output, and memory subsystems. | 3.0 | Prereq: 2560 and 3561, and undergraduate enrollment in ECE, CSE, or EngPhysics major; or Grad standing in Engineering. | Not open to students with credit for CSE 3421. |
| xe | | | 5400 | Instrumentation, Signals, and Control in Transportation Applications | Interdisciplinary course bringing together electrical engineering tools and transportation applications. Students gain valuable experience working in teams while learning traffic flow, surveillance and control. | 3.0 | Prereq: 2100 or 292 or 294 (Spring 2011) or 301, and Math 2415 (415); or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. | Not open to students with credit for 675, CIVIE n 6750 (675), or 4750. <i>Cross-listed in CIVIE n 5750.</i> |
| x | | | 5460 | Image Processing | Fundamentals and research directions in image processing: cameras, geometry, calibration, 2D and 3D image reconstruction, stereo, structure from motion, Radiometry, filtering, motion estimation, and applications. | 3.0 | Prerequisites: ECE 600 or ECE 5200; and Math 530 or STATS 427 or STATS 3470; or graduate standing in engineering, or biological sciences, statistics, bioinformatics, or math & physical sciences. | Not open to students with credit for ECE 707. |
| x | | | 5462 | HDL Design and Verification | The detailed design and verification of major components of a computer architecture using a standard hardware description language (HDL). | 3.0 | Prereq: 5362, or 561 and 662, or CSE 675.01 or equiv, or Grad standing in Engineering. | Not open to students with credit for 762 or 764. |

* These are the normal semesters of offering. While we try our best to offer courses on their regular schedule, please note that semesters of offering may change, particularly 5000-level and above.

| Au* | Sp* | Su* | Course# | Course Name | Course Description | Credits | Requisites | Exclusions |
|-----|-----|-----|-----------------|---|--|---------|--|--|
| xe | | | 5463 | Introduction to Real Time Robotics Systems | Components of a robot system, robot forward and reverse kinematics; robot dynamics; robot force generation, robot trajectory generation. | 3.0 | Prereq: Math 2177 or 2174, or 2415 and 2568; and Physics 1250, 1250H, 1260, or 2300; and CSE 1221, 1222, Engr 1181, 1281.01H, 1281.02H, 1221, or 1222; or Grad standing in Engr; or permission of instructor. Cross-listed in MechEng. | Not open to students with credit for MechEng 5463 or 7752. |
| | x | | 5465 | Advanced Microcomputers | An investigation of current microcomputer structures with emphasis on hardware implementation of I/O, direct memory access, interrupts, memory, and microprogramming. | 3.0 | Prerequisites: ECE 5362 or (ECE 662 and ECE 694A) or graduate standing in engineering. | Not open to students with credit for ECE 765. |
| | x | | 5466 | Embedded Computer Systems | This course introduces the design principles, analysis methods and case studies of microprocessor-based and time-critical embedded systems, such as sensor and actuator networks, multimedia devices, mobile phones, and avionics. Topics include real-time operating systems, processor scheduling, performance control, resource management, power-aware design, energy optimization, etc. | 3.0 | Prereq: 5362, or Grad standing in Engr. | Not open to students with credit for 8194.03. |
| x | | | 5510 | Introduction to Computational Electromagnetics | Numerical methods for solving Maxwell equations both static and electrodynamics, introduction to finite difference, finite element and integral equation methods, and applied linear algebra. | 3.0 | Prereq: 3010; or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. | Not open to students with credit for 715 or 813. |
| x | | | 5530 | Fundamentals of Semiconductors for Microelectronics and Photonics | Crystal structure, semiconductor energy band structure, electron transport and carrier recombination, heterostructures, optical and dielectric properties | 3.0 | Prerequisite: ECE 3030 or ECE 432 or graduate standing in engineering or biological sciences or math & physical sciences. | Not open to students with credit for ECE 730 |
| xe | | | 5550 | Computational Humanitarianism | Computational models of individual and group poverty and underdevelopment; computational social justice; assessing social impact of technology; sensitivity analysis for technology prioritization and design; feedback control for computer automation of helping to meet social justice objectives: social agreement, choice, and allocation. | 3.0 | Prerequisite: Jr, Sr or Grad standing in College of Engineering; or permission of instructor. | Not open to students with credit for 5194.06. |
| x | | | 5551 | State-Space Control Systems | Discrete-time state variable representations; pole placement via state-feedback; introduction to realization theory; observer design; introduction to Kalman filtering; linear quadratic regulator theory. | 3.0 | Prerequisite: ECE 3050 and Stat 3470; or Grad standing. | |
| | xe | | 5553 | Autonomy in Vehicles | Autonomy in the context of modern vehicles; cruise control, anti-lock brake systems (ABS), steering control/lane keeping; introduction to automated highway systems (AHS). | 3.0 | Prerequisite: ECE 3551 or ECE 551 or ECE 5551 or graduate standing in engineering. | Not open to students with credit for 753.02. |
| | xo | | 5554 | Powertrain Control Systems | Application of digital control system theory, from viewpoints of input-output and state variable representations, to realistic problems in automotive powertrain systems. | 3.0 | Prereq: 3551, 5551, or 551, or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. | Not open to students with credit for 753.01. |
| x | x | x | 5555 | Securing Autonomous Systems | The course covers different security measures for safeguarding against cyberattacks, detecting cyberattacks, and mitigating the effects of cyberattacks on autonomous control systems. | 3.0 | Prerequisite: ECE 3050, or Graduate standing in Engineering, Math or Statistics | |
| - | - | | 5557 (in limbo) | Control System Implementation Laboratory | Laboratory study of advanced feedback control techniques as applied to nonlinear and multi-output systems under computer control. | 2.0 | Prerequisites: ECE 5551 or ECE 551, and acceptance in ECE major; or graduate standing in engineering or math & physical sciences. | Not open to students with credit for ECE 758. |
| | x | | 5561 | Introduction to Cybersecurity | Introduction to cybersecurity. Technical fundamentals of data, software, component, network, and system security. Cybersecurity from an organizational and societal view point, including human factors. | 3.0 | Prerequisite: Junior, senior, or grad standing, or permission of instructor. | Not open to students with credit for CSE 5471. |

* These are the normal semesters of offering. While we try our best to offer courses on their regular schedule, please note that semesters of offering may change, particularly 5000-level and above.

| Au * | Sp * | Su * | Course# | Course Name | Course Description | Credits | Requisites | Exclusions |
|------|------|------|---------|--|--|---------|--|--|
| | x | | 5567.01 | Offensive Security | This course will give students an overview of existing offensive computing techniques, which include well known attacks that break confidentiality, integrity and availability of computing resources. Attacks targeting on human weaknesses without taking special care to security will also be discussed. | 3.0 | CSE 2431, 5431 or graduate standing | Not open to students with credit for CSE 5477.01. |
| | x | | 5567.02 | Reverse Engineering and Malware Analysis | This course will give students an overview of cutting edge reverse engineering techniques as well as software security and defense practices. Programming experience in C required. | 3.0 | Prereq: CSE 2431, 5431 or graduate standing. Prereq or concur: ECE 5561 or CSE 5471. | Not open to students with credit for CSE 5477.02. Cross-listed with CSE 5477.02. |
| x | | | 5759 | Optimization for Static and Dynamic Systems | Numerical optimization techniques as applied to selected electrical engineering application areas. | 3.0 | Prereq: 3050, or Grad standing in Engineering or Math and Physical Sciences. | |
| | x | | 5560 | Advanced Hardware Architecture Design Techniques | This course introduces highly-practical methodologies and techniques that can be broadly used to improve the efficiency and achieve speed-area-power tradeoffs in the design of application-specific hardware implementation architectures for various algorithms. Efficient implementation architectures of commonly used arithmetic and digital signal processing functional blocks will also be | 3.0 | Prereq: 2050, and prereq or concur: 3561 or 3050; or Grad standing in Engr; or permission of instructor. | Not open to students with credit for 5194.08. |
| | x | | 5570 | Antiracist Technology | Discrimination against racial and ethnic minorities is prevalent, systemic, and global. Racism and racial justice principles are outlined. Case studies on racist technologies, those that promote or sustain racism, are studied. Engineering design methodology is used to modify or create several new technologies that help the antiracist oppose racism. | 4.0 | ENGR 1182 or 1282 or graduate engineering standing or permission of instructor. | |
| xo | | | 5832 | Photovoltaics and Energy Conversion | Photovoltaic materials and devices; solar cell device physics; solar cell simulation, design and operation; silicon cell technologies; thin film technologies; III-V technologies; nanostructures; terrestrial and space applications. | 3.0 | Prereq: 3030, or Grad standing in Engr or Physics. | |
| | xo | | 5833 | Organic and Printed Flexible Electronics | Conducting organic small molecules and polymers (structural, optical and electrical properties); printable metal-oxide semiconductors; Printing techniques, organic light emitting diodes; transport and carrier injection; organic transistors; organic lasers | 3.0 | Prereq: 3030, or permission of instructor for non-ECE majors; or Grad standing in engineering, biological sciences, or math and physical sciences. | Not open to students with credit for 7833 or 5194.04. |
| x | | | 6001 | Probability and Random Variables | Probability, random variables, and random vectors for analysis and research in electrical engineering. Distribution functions, characteristic functions, functions of random variables and vectors, Markov chains. | 3.0 | Prereq: Grad standing. | Not open to students with credit for ECE 804 or 805. |
| x | | | 6010 | Electromagnetic Field Theory I | Maxwell's Equations; plane waves; field representations and solutions in unbounded space; waveguides and cavities; elements of Green's Functions; cylindrical and spherical waves; electromagnetic theorems. | 3.0 | Prereq: ECE 5010 or ECE 713, and ECE 5011 or ECE 613, or graduate standing in engineering or biological sciences or math & physical sciences. | Not open to students with credit for ECE 719, ECE 810, or ECE 811. |
| xo | | | 6011 | Bioelectromagnetics | This course provides an introduction to the inter-disciplinary field of bioelectromagnetics for graduate students. Lectures cover the interaction of electromagnetic fields with biological tissues across the frequency spectrum; bioelectromagnetic dosimetry; and various applications of bioelectromagnetics (medical, consumer, and more). | 3.0 | Prereq: Graduate standing in Engineering, Biological Sciences, Mathematical and Physical Sciences; or permission of instructor. | |

* These are the normal semesters of offering. While we try our best to offer courses on their regular schedule, please note that semesters of offering may change, particularly 5000-level and above.

| Au * | Sp * | Su * | Course# | Course Name | Course Description | Credits | Requisites | Exclusions |
|------|------|------|---------|--|---|----------|---|--|
| | xe | | 6030 | Micro-Electro-Mechanical Systems (MEMS) Design | The field of micro-electro-mechanical systems (MEMS) is an interdisciplinary area that includes design and fabrication of sensors and actuators (transducers) that are capable of micron-size mechanical movements. Lectures cover a wide range of topics in design & fabrication. Projects include FE simulation of an inertial, optical, RF, or power MEMS devices as an integral part of this course. | 3.0 | Prereq: Graduate standing in engineering or physics, or permission of instructor | Not open to students with credit for ECE 6194.06. |
| x | x | | 6070 | Project Management in Electrical and Computer Engineering | Students learn project management principles and apply them to Electrical and Computer Engineering real-world projects. | 3.0 | Prereq: Grad standing in Electrical and Computer Engineering. | Not open to students with credit for 6194.02. |
| x | | | 6101 | Computer Communication Networks | Foundational understanding of network analysis, error-control, routing, congestion-control, multi-access, and their examples in the context of the existing communication networks. | 3.0 | Prereq: Undergraduate course in probability or Stat 3470 or Math 530 or Stat 428 or Stat 520 or ECE 6001 or ECE 804. Cross-listed in CSE 6461 | Not open to students with credit for ECE 861, ECE 862, CSE 861, CSE 862 or CSE 6461. |
| xo | | | 6102 | Wireless Networks | Design principles and communication algorithms for wireless networks with a focus on MAC and routing protocols, scheduling algorithms, power control, and scaling properties. | 3.0 | Prereq: none | Not open to students with credit for both 867 and 894.03. |
| x | x | x | 6193 | Individual Studies in Electrical and Computer Engineering | Individual studies project. | 0.0-12.0 | Prereq: Permission of instructor. | Repeatable to a maximum of 12.0 cr hrs or 12 completions. This course is graded S/U. |
| | | | 6194.05 | Neuroelectronics | This course gives an introduction on neuroelectronics for graduate students with engineering backgrounds. Focusing on circuits and principles, this course covers neural interfaces, neural recording and stimulation, wireless power and data transfer, and system integration and introduces cutting-edge developments on neural prosthetics. | 3.0 | Prereq: Graduate standing in engineering or physics, or permission of instructor. | |
| | | | 6194.09 | Oxide Semiconductors: Materials and Devices | We will study the fundamentals of c-axis-aligned crystalline indium-gallium-zinc oxide (CAAC-IGZO) semiconductors. Phase diagrams, crystal structures, fabrication process, defect levels, origin of main donors, and electrical conduction mechanisms will be discussed. CAAC-IGZO based field-effect transistors will be introduced. We will cover the basics of the emerging ultrawide band Ga2O3 and In2O3. | 3.0 | | |
| | | | 6194.10 | Advanced Semiconductor Lasers | This course will cover the essential subjects of basic diode lasers, single-mode as well as tunable laser diodes, from theory to applications. It will cover fundamentals of modern laser diodes including vertical-cavity surface emitting lasers and interband cascade lasers. The basic principles of operation, design, and practice of widely tunable lasers will also be discussed. | 3.0 | Prereq: 5131. | |
| | xo | | 6202 | Stochastic Signal Processing | Spectrum estimation, array processing, adaptive filtering. | 3.0 | | Not open to students with credit for ECE 800 or 801.01. |
| | x | | 6244 | Design and Process Integration for Wide Band Gap Power Devices | Design and processing of wide band gap power devices (including SiC, GaN and ultra wide band gap semiconductors) and reliability considerations. 2D device simulations, layout considerations for power chip design, optimization of performance and reliability/qualification for various voltage ranges from 600 V to 15 kV. | 3.0 | Prereq: Grad standing in Engineering or Physics. | Not open to student with credit for 6234. |

* These are the normal semesters of offering. While we try our best to offer courses on their regular schedule, please note that semesters of offering may change, particularly 5000-level and above.

| Au * | Sp * | Su * | Course# | Course Name | Course Description | Credits | Requisites | Exclusions |
|------|------|------|---------|---|---|----------|---|---|
| xo | | | 6511 | Nonlinear Optics | Nonlinear optics for the generation, propagation, amplification, and control of laser light; all-optical switching and solitons; modern applications in high speed lightwave devices and systems. | 3.0 | Prerequisite: 5012, or Grad standing. | |
| | x | | 6531 | Fundamentals of Semiconductor Devices | An overview of the physics, design, and engineering of semiconductor electronic and optoelectronic devices. Applications of silicon, compound semiconductor, and nanotechnology will be covered. | 3.0 | Prereq: 5530 (730), or permission of instructor. | Not open to students with credit for 5531. |
| | xe | | 6532 | Nanofabrication & Nanoscale Devices | Fundamentals of nanostructures and devices; engineering and physics of new devices, confined structures in low dimensions and their effects on traditional devices; nanofabrication and nanomanufacturing. | 3.0 | Prereq: ECE 6531, 5531, or 730 or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. | Not open to students with credit for 5532 (835.03). |
| xe | | | 6533 | Infrared Detector and Systems | This course will cover the basics of infrared photodetectors and systems. It will include basic geometrical optics, radiometry, figures of merit and types of infrared detectors. | 3.0 | Prereq: 5530, or permission of instructor. | Not open to students with credit for 5194.10. |
| | x | | 6535 | Semiconductor Optoelectronic Devices | This course will cover the basics and physics of semiconductor optoelectronic devices including light-emitting diodes, semiconductor lasers, photodetectors, and solar cells. | 3.0 | Prereq: Grad standing in engineering or physics. | |
| | x | | 6541 | Advanced Topics in Sustainable Energy and Power Systems | Advanced topics in sustainable energy and power systems; basic issues and solutions to sustainable energy; the concept of smart grid; cyber control and security. | 3.0 | Prereq: ECE 5025 (624) or 724. | Not open to students with credit for ECE 5541. |
| | x | | 6750 | Linear System Theory | In-depth treatment of linear dynamical systems. State equations solution. Controllability and observability. Canonical forms. Internal and external stability. Linear feedback and observer design. Geometric theory. | 3.0 | Prerequisites: ECE 5551 or ECE 551 or graduate standing in engineering or math & physical sciences. | Not open to students with credit for ECE 5750 (750). |
| x | | | 6754 | Nonlinear Systems Theory | Provides fundamental mathematical tools for the analysis of nonlinear dynamical systems. Basic techniques for the synthesis of nonlinear control systems are introduced. | 3.0 | none listed | Not open to students with credit for ECE 5754. |
| x | x | x | 6999 | Research for Thesis | Research for thesis. | 0.5-15.0 | Repeatable to a maximum of 15.0 cr hrs or 30 completions. This course is graded S/U. | |
| | x | | 7001 | Stochastic Processes, Detection, and Estimation | Stochastic processes; detection and decision theory; hypothesis testing, parameter estimation; applications to communications and signal processing. | 3.0 | Prerequisite: ECE 6001 or ECE 804. | Not open to students with credit for ECE 806. |
| xo | | | 7003 | Wireless Communication Theory | Theory and analysis of wireless communication systems. Topics include: multipath fading channels; modulation, equalization, and coding for fading channels; MIMO systems; capacity calculations. | 3.0 | Prerequisite: ECE 804 or ECE 6001. | Not open to students with credit for ECE 807 or 809. |
| | xo | | 7005 | Information Theory | Mathematical models for channels and sources: entropy, information, data compression, channel capacity, Shannon's theorems, rate distortion theory. | 3.0 | Prerequisite: ECE 804 or ECE 6001. | Not open to students with credit for ECE 801.02 |
| | x | | 7010 | Electromagnetic Field Theory II | Green's functions with applications; spectral representation of sources; sources in layered media and Sommerfeld integrals; time-domain fields, retarded potentials, and transients; periodic structures; integral equations. | 3.0 | Prerequisite: ECE 719 or ECE 6010. | Not open to students with credit for ECE 810 and ECE 811. |

* These are the normal semesters of offering. While we try our best to offer courses on their regular schedule, please note that semesters of offering may change, particularly 5000-level and above.

| Au * | Sp * | Su * | Course# | Course Name | Course Description | Credits | Requisites | Exclusions |
|------|------|------|--------------------|--|--|---------|--|--|
| | xe | | 7011 | Computational Electromagnetics | Advanced topics in numerical methods for solving Maxwell equations, including finite element methods, integral equation methods, and their hybridization. | 3.0 | Prerequisite: ECE 715 or ECE 5510 or ECE 6010 | Not open to student with credit for ECE 813 or ECE 814. |
| | xe | | 7013 (in limbo) | Advanced Radar Systems | Advanced and emerging topics in radar sensing. For graduates conversant with radar systems. Combination of lectures and student projects based on tutorials. Distributed sensing, bio-insred sensing, and cognitive sensing will be covered. For each area, students will propose and study in detail a topic, and report on the theoretical foundation, state of the art, and future challenges. | 3.0 | Prereq: 5013 or 5194.01, or permission of instructor. | |
| xe | | | 7020 | Advanced Data Converters and Phase-Locked Loops | A comprehensive overview of the most recent system architectures of data converters and phase-locked loops. Provides a good understanding how performance specifications and process technology limitations lead to implementation decisions. The presented principles are illustrated by examples and real life case studies. | 3.0 | Prereq: 5021 or 5023, or permission of instructor. | |
| | x | | 7022 | Advanced RF Integrated Circuits | Advanced topics on RF and mm-wave circuits. Frequency synthesizers, transmitter linearization techniques (e.g. polar circuits), MIMO and phase array circuits, power D/As. | 3.0 | Prerequisite: ECE 620 or ECE 5022 or graduate standing in engineering or biological sciences or math & physical sciences. | Not open to students with credit for ECE 694K or ECE 694.02. |
| | xe | | 7023 | High Speed Interface Circuits and Systems Design | Analysis and design of link architectures and circuits for wireline communication systems. Emphasis on design intuition, link budgeting and power/performance trade-offs in implementation of data links in advanced CMOS process. Topics include channel characterization, noise analysis, equalization, transmitter and receiver circuits, signaling schemes, clocking, synchronization and timing recovery. | 3.0 | Prereq or concur: 5020 and 5021, or permission of instructor. | |
| | xo | | 7027 | Advanced Topics in Analog VLSI Design | Advanced topics in analog VLSI design, such as integrated data converters, or power management integrated circuits, or high-performance analog circuits. This includes: system and circuit architectures, performance metrics, practical implementations, design considerations in advanced semiconductor processes, chip design projects, and lab characterization. | 4.0 | Prereq or concur: 5021 and 5227; or Grad standing in Engineering, or Math and Physical Sciences, and permission of instructor. Repeatable to a maximum of 8 cr hrs | |
| | xe | | 7032 | Physical Electronics of Advanced Semiconductor Devices | MOSCAPs, Gated Diode, CMOS Bulk/SOI Transistors, Photodiodes, Carrier Transport/Storage, Scaling, Mobility, CCDs, CMOS, EEPROMs, SiGe, SiC, ISFETs, BJTs, Noise and Modeling. | 3.0 | Prereq: 5530 (730) or 6531. | Not open to students with credit for 894 (Spring 12, Class number 26147) or 8194.04. |
| - | - | | 7080 | Ethics and Professionalism | Professionalism standards, ethical dilemmas, codes of ethics, moral frameworks and social justice, engineering as social experimentation, safety and risk, workplace rights and responsibilities, professional communications, research integrity, environmental ethics, global issues. Case study based approach. | 1.0 | Prereq: Grad standing in ECE. | This course is graded S/U. |
| | xo | | 7100 | Network Optimization and Algorithms | Convex optimization, probabilistic, and algorithmic methods for the design and analysis of efficient and practical algorithms for complex and stochastic communication networks. | 3.0 | Prerequisite: Graduate standing. | Not open to students with credit for ECE 894R. |
| | xe | | 7103 | Discrete Stochastic Processes | Stochastic processes in discrete time or space for electrical engineering. Renewal theory, Markov chains and processes, dynamic programming, basic large deviations theory and martingales. | 3.0 | Prerequisite: ECE 804 or ECE 6001. | Not open to students with credit for ECE 894Q or ECE 894.01. |

* These are the normal semesters of offering. While we try our best to offer courses on their regular schedule, please note that semesters of offering may change, particularly 5000-level and above.

| Au* | Sp* | Su* | Course# | Course Name | Course Description | Credits | Requisites | Exclusions |
|-----|-----|-----|---------|--|---|---------|--|---|
| | xe | | 7200 | Signal Processing | Multi-rate signal processing, filter banks, perfect reconstruction, time-frequency analysis, and wavelets and applications. | 3.0 | | Not open to students with credit for ECE 700. |
| xo | | | 7531 | Epitaxial Heterostructures (cross-listed with MSE) | Science and techniques behind thin film growth and engineering for combining different materials, altering chemical composition at the nanometer scale, while controlling defects and strain. Epitaxial crystal growth will be explained. Students will gain an understanding of the kinetics, thermodynamics, and technology involved in epitaxial heterostructures and self-assembled nanostructures. | 2.0 | Prereq: Grad standing. | Not open to students with credit for MSE 7531. Cross-listed in MSE. |
| xo | | | 7811 | Electromagnetic Interference and Compatibility | Electromagnetic Interference and Compatibility, Signal Integrity in ICs, Conducted Emissions and Electromagnetic Radiation Susceptibility, Crosstalk and Shielding | 3.0 | Prerequisite: ECE 719 or ECE 6010. | Not open to students with credit for ECE 614. |
| xe | | | 7813 | Advanced Antenna Theory and Design | Topics in Advanced Antenna Theory and Design | 3.0 | Prereq: 5011 or 613, or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences | Not open to students with credit for ECE 815. |
| | xo | | 7814 | Microwave Remote Sensing | Description of microwave remote sensing systems. Theories of scattering from random media and rough surfaces. | 3.0 | Prereq: 6010. | Not open to students with credit for 816. |
| xo | | | 7821 | Mixed Signal Verification and CAD Tools | Principles of combining analog, RF, and digital design, simulation, and verification strategies using modern CAD tools | 3.0 | Prerequisite: ECE 622 or ECE 720 or ECE 5020. | Not open to students with credit for ECE 894Z or ECE 822. |
| xo | | | 7822 | Advanced Nonlinear Microwave Circuit Engineering | Large-signal characterization and modeling of nonlinear RF circuits; power amplifiers; oscillators; modulators; wideband linearization, power efficient design. | 3.0 | Prerequisite: ECE 723 or ECE 5027. | Not open to students with credits in ECE 694.02 or ECE 694K. |
| xe | | | 7831 | High speed Semiconductor Devices | Principles of microwave semiconductor devices; scattering and high-field transport; Gunn effect; FET wave equation, HEMT; HBT; large signal RF modeling and measurements; noise; traps; self-heating. | 3.0 | Prerequisite: Grad standing in Engr or Physics. | Not open to students with credit for ECE 832. |
| xe | | | 7841 | Advanced Topics in Power Electronics | Advanced topics of power electronics, beginning with utility and vehicle applications and evolving into advanced circuit topologies and control. | 3.0 | Prerequisite: ECE 624 or ECE 5025. | Not open to students with credit for ECE 844. |
| xe | | | 7842 | Advanced Topics in Electric Machines | Advanced topics of electric machines, beginning with dynamic modeling and principles of vector control and evolving into new design and control of electric machines for advanced traction motors and renewable energy generator systems. | 3.0 | Prereq: 5541 (643) and 5551 (650). | Not open to students with credit for 743, 744, or 845. |
| | xe | | 7843 | Advanced Topics in Power Systems | Advanced topics of power system protection, beginning with equipment protection and evolving into system wide protection design and operation to accommodate smart-grid technologies. | 3.0 | Prerequisite: ECE 5042 or 740. | Not open to students with credit for ECE 741. |
| | xe | | 7850 | Hybrid Dynamical Systems: Theory and Applications | Introduction to hybrid systems (continuous dynamics coupled with discrete logic rules). Topics include stability analysis, optimal control, model predictive control, reachability, and state estimation of hybrid systems. Emphasis will be placed on applying existing hybrid systems theories to a wide range of applications in networked control systems, smart grid, power electronics, and robotics. | 3.0 | Prerequisite: 6750 or 5750 (750) | |

* These are the normal semesters of offering. While we try our best to offer courses on their regular schedule, please note that semesters of offering may change, particularly 5000-level and above.

| Au * | Sp * | Su * | Course# | Course Name | Course Description | Credits | Requisites | Exclusions |
|------|------|------|-----------------|---|--|----------|--|---|
| xo | | | 7854 | Nonlinear and Adaptive Control | Advanced analysis of uncertain nonlinear systems. Design methodologies for complex interconnected nonlinear systems. Applications of nonlinear and adaptive control design to aerospace and robotic systems. | 3.0 | Prereq: 6754 (5754 or 754) and 6750 (5750 or 750). | Not open to students with credit for 857 |
| - | - | | 7855 (in limbo) | Large Scale and Cyber-Physical Systems | Decentralization, hierarchy and their effects on modeling, stability analysis, and optimal controller design. Hybrid system based modeling and design of Cyber-Physical Systems. | 3.0 | Prerequisite: ECE 5750 or ECE 750 | Not open to students with credit for ECE 855. |
| | xe | | 7858 | Intelligent Control | Fuzzy control, neural control, genetic algorithms, learning control, and distributed intelligent control | 3.0 | Prereq: 5551 (551) or equiv. | Not open to students with credit for ECE 858. |
| | xo | | 7859 | Sliding mode control in electromechanical systems | Sliding modes an efficient tool to control high order dynamic plants operating under uncertainty conditions | 3.0 | Prerequisite: ECE 750 or ECE 5750 | Not open to students with credit for ECE 859 or MECH ENG 859. |
| - | - | | 7861 (in limbo) | Scientific Computing on Emerging Architectures | Students will be introduced to the architectural system design of emerging architectures and techniques for managing idiosyncrasies of these architectures for developing scientific computing applications. | 3.0 | Prerequisite: ECE 762 or ECE 5362 or CSE 2431 or CSE 5431. | Not open to students with credit for ECE 694.03 or ECE 694J. |
| | xo | | 7864 | Advanced Computer Design | Parallel computer architectures, pipeline design, multiprocessor design, interprocessor communication, multi-core architectures, case studies and application examples. | 3.0 | Prerequisite: 5362 (662) or Grad standing. | Not open to student with credit for 864. |
| xe | | | 7866 | Computer Vision | Computer vision systems, image models, feature extraction, shape representation and recognition, object modeling and recognition, matching, probabilistic and statistical modeling, semantic knowledge, face perception. | 3.0 | Prereq: 5460 (707). | Not open to students with credit for 863. |
| | xe | | 7868 | Pattern Recognition and Machine Learning | Fundamentals of pattern recognition techniques and their application to computer and electrical engineering problems, medicine, cognitive science, and bioinformatics. | 3.0 | Prereq: 6001 (804). | Not open to students with credit for both 779 and 874. |
| - | - | | 8001 | Advanced Topics in Communications | Current topics in information theory and the practice of digital communications. | 3.0 | Prerequisite: ECE 7001 or 806. | |
| | xo | | 8019 | Advanced Topics in Electromagnetics and Optics | Topics are chosen to prepare graduate students for research and application in current problems in electromagnetics and optics. | 3.0 | Prerequisite: ECE 719 or ECE 6010. | |
| x | | | 8101 | Advanced Topics in Networks | Advanced topics and new areas of interest in the theory of networking and networked systems. | 3.0 | Prerequisite: ECE 804 or ECE 6001. | |
| x | x | x | 8193 | Individual Studies in Electrical and Computer Engineering | Individual studies project. | 0.0-12.0 | Prereq: Permission of instructor. | Repeatable to a maximum of 12.0 cr hrs or 12 completions. This course is graded S/U |
| | | | 8201 | Advanced Topics in Signal Processing | Current topics in the theory and practice of signal processing. | 3.0 | Prerequisite: ECE 806 or ECE 7001. | |
| | xe | | 8250 | Continuous Time Optimal Control | | | Cross-listed with ME8220. | |
| xo | xo | | 8851 | Advanced Topics in Control Theory | Current topics in control theory, optimization, and decision theory. | 3.0 | Prerequisite: Permission of instructor. | Repeatable to a maximum of 6.0 credit hours or 2 completions. |
| - | - | | 8861 (in limbo) | Special Topics on Computational Modeling | The course will review the latest computational models and advanced methods for modeling processes of diverse sorts. | 3.0 | Prerequisite: Graduate standing in engineering or biological sciences or math & physical sciences. | |

* These are the normal semesters of offering. While we try our best to offer courses on their regular schedule, please note that semesters of offering may change, particularly 5000-level and above.

| Au* | Sp* | Su* | Course# | Course Name | Course Description | Credits | Requisites | Exclusions |
|-----|-----|-----|---------|--|---|----------|---|------------|
| | x | | 8862 | Special Topics in Advanced Computer Design Methodologies | Design automation, computer aided design, testing, and design for energy efficiency. | 3.0 | Prerequisite: Grad standing in Engineering. Repeatable to a maximum of 9 cr hrs. | |
| x | x | x | 8891 | Seminar in Electrical and Computer Engineering | Seminar in electrical and computer engineering. | 0.5-2.0 | Prerequisite: Graduate standing in electrical and computer engineering. Repeatable to a maximum of 12.0 cr hrs or 6 completions. This course is graded S/U. | |
| x | x | x | 8898 | Open Graduate Seminar | As an introduction to potential research areas, students will attend OSU sponsored talks relevant to topics in Electrical Engineering and critique them by written reports. | 0.5-3.0 | Prerequisite: Graduate standing in electrical and computer engineering. Repeatable to a maximum of 6.0 cr hrs or 6 completions. This course is graded S/U. | |
| x | x | x | 8999 | Research for Dissertation | Research for dissertation. | 0.5-15.0 | Repeatable to a maximum of 30 completions. This course is graded S/U. | |

* These are the normal semesters of offering. While we try our best to offer courses on their regular schedule, please note that semesters of offering may change, particularly 5000-level and above.
