Ed. 2.16.16

The Ohio State University Department of Electrical and Computer Engineering

Rare NSF grant keeps Prof. Brillson's microelectronics research going strong

For 20 years, Ohio State Electrical and Computer Engineering/Physics professor **Len Brillson** and his team have explored the micro-scale world of electronics in order to advance next-generation technology. The National Science Foundation just gave him a rare grant extension to keep their work going strong: Full story: <http://go.osu.edu/brillson-nsf>

The science behind Martin Shkreli's "punchable" face

I have to admit, this story amused me to no end. Read how our own ECE professor, **Aleix Martinez**, was asked to help weigh in with his own assessment for one writer: Why is pharmaceutical price-gouger Martin Shkreli's face so punchable? ...scientifically, of course.

Story: <http://go.osu.edu/shkreli-martinez>

MAKEATHON

2016

ECE alumna earns prestigious NAE membership

The National Academy of Engineering (NAE) just announced its list of new 2016 members, and ECE alumnus **Dr. Yilu Liu** now earns her place in professional distinction. Find my article on Liu and learn which Ohio State engineering alumni share this honor.

My story: <http://go.osu.edu/liu-nae>
Article that ran at her university: <http://go.osu.edu/liu-nae-tenn>

The best hardware event at Ohio State returns, with **Makeathon 2016**, set for March 5 and 6 at Knowlton Hall. Find out all the details, links to organizers and sponsors, video from the 2015 event, as well as how to register:
