## K12 Engineering Outreach crowdfunding page goes live

On May 2, The Ohio State University worked with the Department of Electrical and Computer Engineering to launch the first online crowdfunding campaign to help keep the **K12 Engineering Outreach Program** going strong.

Since 2008, hundreds of student engineering volunteers have reached out to inspire over 13,500 underserved children at schools, summer camps and libraries across Ohio and beyond.

People have offerred donations in the past. The new campaign page now makes that process easy.

The goal of the crowdfunding page is to raise $3,500 throughout the month of May. The good news? One week in and fundraising has already surpassed the halfway mark.

A little donation goes a long way. Visit the link page below to donate, share it around online, or just learn more about how engineering students and faculty team up to keep children inspired about technology in the modern world.
