Are you an undergraduate student majoring in computer engineering, electrical engineering, computer/software engineering, telecommunications engineering, computer science, or other related discipline?

Spend your summer with us at Wichita State University, working on National Science Foundation-funded research on networked cyber-physical systems. You will spend nine weeks — May 27-July 27, 2018 — living on the Wichita State campus and working on research with faculty mentors.

We pay travel, lodging and food expenses ($1080), as well as a $4,500 stipend to successful applicants.
